Printed in Great Britain

Contents of Volume 19

Number 1, *April* 1968

AINSWORTH, S., A Comparative Study of Some Mechanisms Describing Interaction Effects in a Dimeric, Two-substrate Enzyme Catalysed Reaction 1

DISTEFANO, J. J. and STEAR, E. B., On Identification of Hypothalamo-hypophysial Control and Feedback Relationships with the Thyroid Gland 29

ZAJICEK, G., A Computer Model Simulating the Behavior of Adult Red Blood Cells. Red Blood Cell Model 51

GEDULDIG, D., Analysis of Membrane Permeability Coefficient Ratios and Internal Ion Concentrations from a Constant Field Equation 67

CALOGERO, F., Solution of Infinite Systems of Differential Equations of Possible Interest in Evolutionary Theories 79

ROBINSON, J. D., Regulating Ion Pumps to Control Cell Volume . 90

OHKI, S., Dielectric Constant and Refractive Index of Lipid Bilayers 97

STIBITZ, G. R., A Model and Computer Program for Biological Networks 116

Number 2, *May* 1968

NAGATA, C. and MÅRTENSSON, O., On the Mechanism of Mutagenic Action of Hydroxylamine 133

CHUN, P. W., FRIED, M. and YEE, K. S., Determination of the Equilibrium Constants of Associating Protein Systems I. The Application of Stepwise Polynomial Regression Analysis. . 147

MACGILLIVRAY, A. D. and MCMULLEN, A. I., Theory of Helix-coil Transitions Based on the Non-linear Poisson–Boltzmann Equation 159

ROUSLIN, W. and BRASWELL, E., Analysis of Factors Affecting Lactic Dehydrogenase Subunit Composition Determinations . . 169

NAORA, H., A Plausible Mechanism of Simultaneous Read-out of Genetic Information from both Strands of DNA . . . 183

RUSSELL, C. D., Acid–Base Metabolism and the Proton Condition . 196

DARVEY, I. G., Transient Phase Kinetics of Enzyme Reactions . . 215

TENFORDE, T. and MACEY, R., Membrane Diffusion with Feedback Regulation of Cell Volume; Estimation of Membrane Tortuosity and Diffusion Coefficients 232

Number 3, *June* 1968

POLLAK, M. and REIN, R., An Examination of the Energetics of Crick's Wobble Hypothesis 241

RAPOPORT, S. I., Active Transport in Isotropic and Anisotropic Systems. A Critical Analysis 247

DOERNER, K. JR., Stresses and Duration of Cellular Contact . . 275

SAIDEL, G. M., Bacterial Cell Populations in a Continuously Changing Environment 287

THOMA, J. A., A Possible Mechanism for Amylase Catalysis . . 297

STEWART, R. M., Model Analysis of Electrical Conduction through Morphologically Complex Cells and Cell Masses . . . 311

EPSTEIN, J., MICHEL, H. O. and MOSHER, W. A., On the Nucleophilicity of Serine in Enzymes 320

LETTERS TO THE EDITOR—

KRUCKENBERG, P. and SANDWEG, R., An Analog Model for Acetylcholine Release by Motor Nerve Endings . . 327

POLLAK, M. and REIN, R., An Electrical Mechanism for Strand Separation of DNA 333

RUSSELL, C. S., Mechanisms as Models for Oxidative Phosphorylation 337

GINGELL, D., Computed Surface Potential Changes with Membrane Interaction 340

J. Theoret. Biol. (1968) **20.**

ERRATA

Analysis of Factors Affecting Lactic Dehydrogenase Subunit Composition Determinations

WILLIAM ROUSLIN AND EMORY BRASWELL

J. Theoret. Biol. (1968) **19,** 169–182

Page 176, Footnote should have read: Equation (13).

Page 177, Table 1C should have read: Calculated (from equation (14)).
